

Teladoc Health SOLO Lite

# Virtual care for emergent clinical settings

As the healthcare landscape shifts, hospitals and health systems need to extend care and expertise into more use cases and environments—including rural and underserved areas—with integrated virtual health devices.\*

The SOLO Lite is designed to make virtual visits feel more natural, expanding virtual care across your organization. Purpose-built for crowded, noisy patient locations, the SOLO Lite provides a more authentic virtual care experience for your staff and patients. Empower remote clinicians with the tools and confidence required to make quick, informed decisions.

## Transforming care delivery and reach

Teladoc Health offers a fully integrated suite of connected care solutions to help hospitals and health systems of all sizes provide innovative in-house telehealth solutions to their patients.

## Best practices from 1,500+ telehealth implementations

The SOLO Lite is just one part of an enterprise-wide virtual care solution designed to support personalized care in any clinical environment and harness data analytics through a single platform to improve the health of whole communities.

### KEY BENEFITS

**24/7 proactive fleet (or system) monitoring**  
ensure the most reliable virtual care delivery

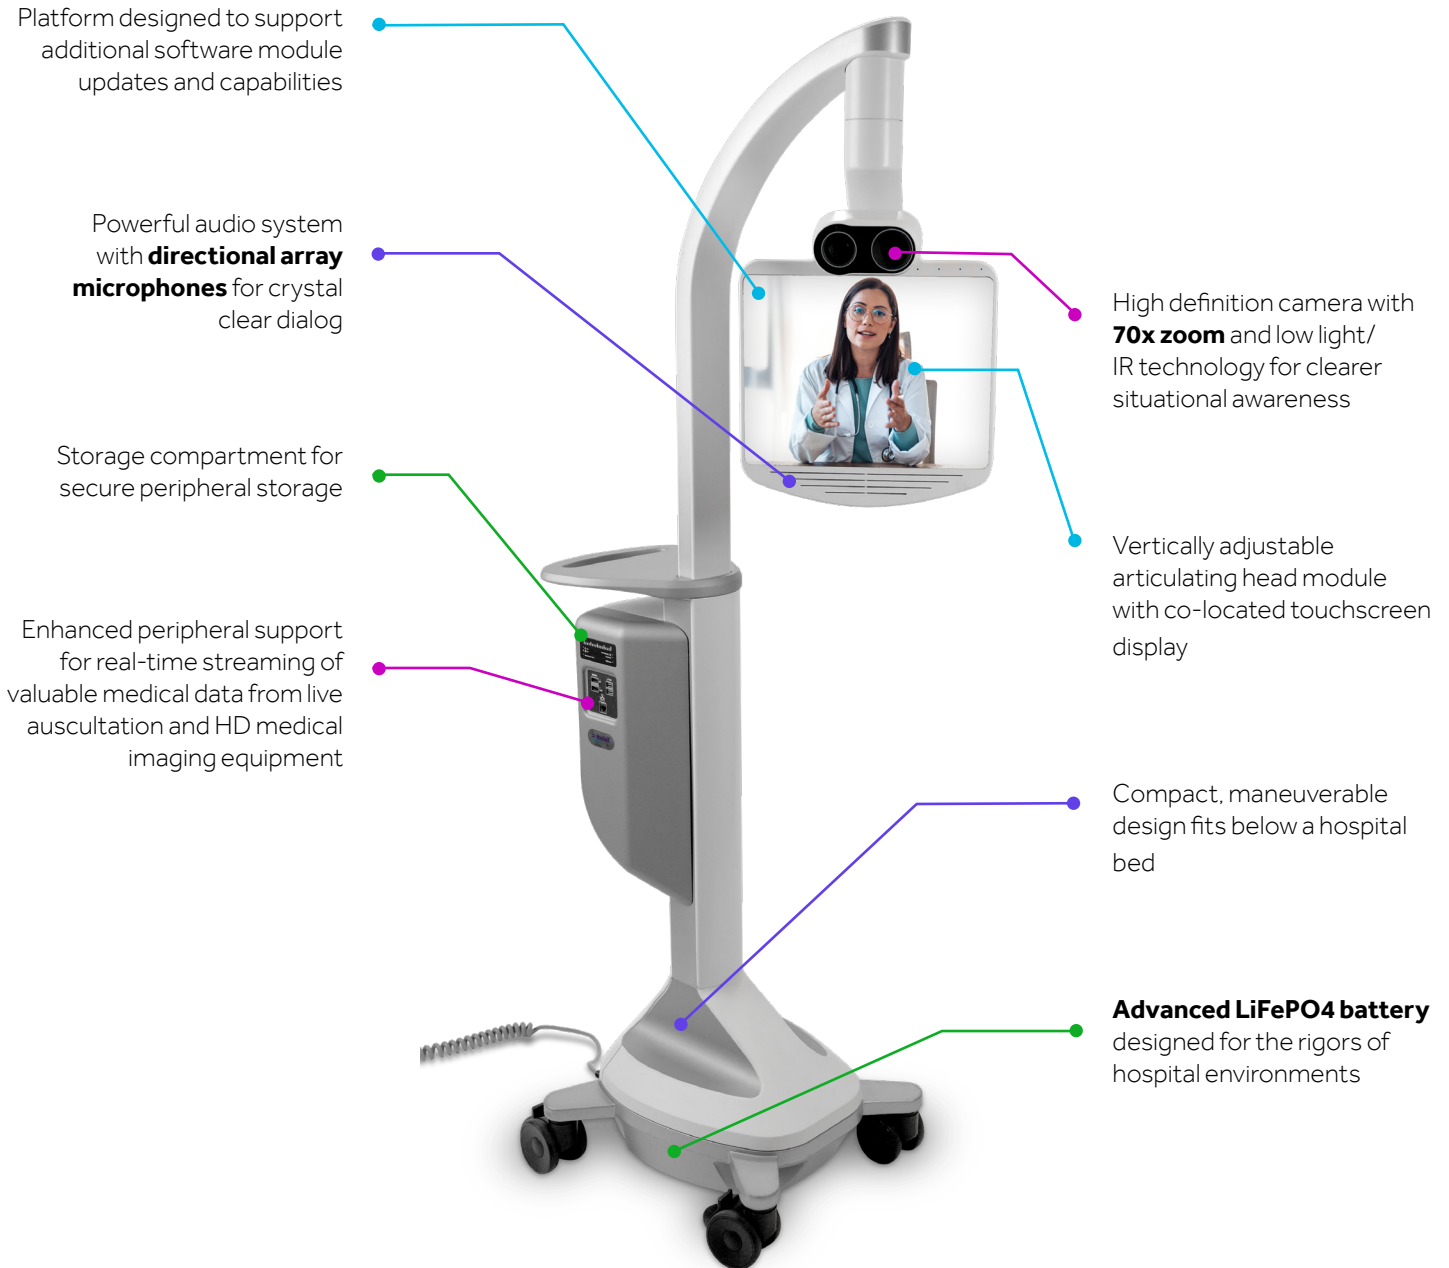

**Extend clinical expertise**  
whenever and wherever it's needed with a highly portable and durable device

**Complement face-to-face patient care** with touchscreen capabilities, an intuitive user interface and comprehensive workflows

# SOLO Lite

Get a clear view over local care teams while seeing precise patient vitals, even in crowded settings

Platform designed to support additional software module updates and capabilities

Powerful audio system with **directional array microphones** for crystal clear dialog

Storage compartment for secure peripheral storage

Enhanced peripheral support for real-time streaming of valuable medical data from live auscultation and HD medical imaging equipment

High definition camera with **70x zoom** and low light/IR technology for clearer situational awareness

Vertically adjustable articulating head module with co-located touchscreen display

Compact, maneuverable design fits below a hospital bed

**Advanced LiFePO4 battery** designed for the rigors of hospital environments

\* Use of the word "device(s)" in this document refers to Teladoc Health telehealth products, not medical devices as defined in Section 201(h) of the FD&C Act.
