

SOLO[®] ProBoom[™]

Reliable specialty support, on demand

SOLO ProBoom is part of our suite of SOLO devices which are purpose-built to deliver consistent, enterprise-grade virtual access and AI solutions into real-world environments.

Designed to strengthen care delivery

Built for modern specialty and high-acuity environments, the SOLO ProBoom helps health systems expand access to expertise, support their teams and deliver consistent, high-quality care across service lines and settings.

With the Solo ProBoom, hospitals can:

Expand access to specialty expertise

Bring remote specialists into procedures without geographic or staffing constraints.

Support rural and underserved settings

Deliver consistent access to expertise without relying on infrastructure upgrades.

Strengthen community trust

Ensure patients receive the highest level of care—close to home.

Purpose-built for precision, positioning and performance

Every component of the SOLO ProBoom is intentionally designed to support specialty care environments—offering fast setup, flexible positioning and clear visualization without disrupting workflows.

One device. Multiple specialty care applications.

- Surgery and procedural collaboration
- Neonatal and maternal care
- Imaging and interventional services

Horizontally adjustable touchscreen display allows local staff to maintain eye-line collaboration with remote experts without breaking workflow.

Vertical height adjustment column adapts easily across ORs, neonatal units, delivery rooms and imaging labs.

Compact cart design is optimized for tight spaces with easy stowing between procedures.

Dual-segment boom arm with PTZ camera delivers precise, adjustable views across a wider care environment—giving remote clinicians direct oversight of the patient.

Integrated PTZ camera and wide angle camera give remote clinicians enhanced situational awareness during specialty, procedural or emergent care. **Integrated audio system** allows for clear, natural communication between on-site and remote teams.

Privacy handset supports confidential communication in sensitive environments.

Long-life LiFePO₄ battery enables extended sessions and mobile workflows without interruption.

See how the SOLO ProBoom fits into your specialty and high-acuity care strategy.
