

10 Delicious spring fruits & vegetables

Plus 5 recipes!

The end of winter is a perfect time to mix up your eating routine with the fresh flavors of spring. Here are 10 of our favorite warmer-weather produce picks. Enjoy!

Fruits

Strawberries

These red beauties are a super source of cell-protecting vitamin C.¹ One cup of whole strawberries has 85 mg, more than a medium orange.

Try it:

Sliced onto cereal or as a refreshing salad topping.

Peak season:

May-June

Avocado

It's true — avocados are fruit! Unlike any other fruit, however, avocados are rich in heart-healthy monounsaturated fat.

Try it:

As a sub for mayo on a sandwich, or sliced on top of chili.

Peak season:

California avocados are in season spring through summer.

Pineapple

This tropical fruit contains the enzyme bromelain, which helps with digestion. It can also counter inflammation in the body.²

Try it:

Cubed and tossed with chili powder or grilled on the barbecue.

Peak season:

March-July

Apricots

Small in size, apricots pack a nutrient punch. They're an excellent source of eye-protecting carotenoid compounds.

Try it:

Chopped and mixed into grains like barley for a salad, or stewed and spooned over yogurt.

Peak season:

May-July

Cherries

Sweet or sour, all cherries provide polyphenol compounds that protect cells from damage. They also cut inflammation.³

Try it:

Chopped and blended into oatmeal, or cooked down into a sauce to spoon over chicken.

Peak season:

June

Vegetables

Artichoke

A great source of fiber, as well as potassium, vitamin C, folate, and magnesium.⁴ It's also fun to eat!

Try it:

Boiled or steamed and served with a healthy dipping sauce.

Peak season:

March-May

Asparagus

One cup has more than half of an adult woman's daily need for vitamin K, a nutrient that helps your blood to clot and your bones to stay strong.⁵

Try it:

Grilled, roasted, or sautéed and topped with a squeeze of lemon juice as a delicious side dish.

Peak season:

April⁶

Broccoli

Move over, oranges. One uncooked cup of broccoli has more than 100% of the immune-boosting vitamin C that adult women need each day.⁷

Try it:

Roasted until crispy or pureed into a creamy soup.

Peak season:

Early spring; second harvest in fall

Peas

A good source of satisfying plant-based protein — 100 calories of raw peas have nearly 8 grams. That's almost 2 grams more than you'll find in a large egg.

Try it:

Blended into a hummus-like dip or sautéed in a bit of olive oil and mixed with lemon zest and chopped mint leaves.

Peak season:

Early spring

Radishes

These cruciferous veggies pack spicy flavor in each bite. They're also rich in powerful compounds that prevent cancer.⁸

Try it:

Thinly sliced in salads if you like a zesty kick, or roasted with oil, salt, and pepper for a more mellowed flavor.

Peak season:

March-June

Roasted asparagus spears

Serving size: **1**

Ingredients

6 asparagus spears
 1 tsp olive oil
 Salt and pepper, to taste
 ½ lemon, juiced

Preparation

Preheat the oven to 425°F. Toss asparagus spears with olive oil, then arrange onto a baking sheet in a single layer. Bake until tender, 12 to 15 minutes. Sprinkle with lemon juice, salt and pepper and serve.

Spring pea soup with pesto

Serving size: **1**

Ingredients

2 tsp olive oil
 1 small onion, chopped
 1 clove garlic, minced
 2 cups frozen peas
 1½ cups water
 Salt and pepper, to taste
 1 Tbsp prepared pesto

Preparation

Sauté onion, garlic, and peas in oil for 5 minutes. Add water and salt and pepper, bring to a boil, and simmer for 10 minutes. In blender, puree mixture and top with pesto.

Broccoli & feta omelet

Serving size: **1**

Ingredients

2 eggs, beaten
 1 cup broccoli, finely chopped
 ½ cup baby spinach
 ½ oz feta cheese
 1 tsp olive oil
 1 slice whole grain toast

Preparation

Combine eggs, chopped broccoli, spinach, and feta cheese. Cook in a pan coated with a little olive oil. Serve with a slice of whole grain toast.
